Offers six months of skills training in the areas of welding and metal fabrication; training is based on a combination of theoretical and practical applications.

Offers a limited 1-2 week work placement component to provide on-the-job training for students to allow them to enhance the skills required for a specific position or employer.

Provides employment placement of graduates matching employer needs and graduates' skills.

Student follow-up for 1 year.

Workshops: Resume workshops, interview skills, WHMIS, blueprint reading, trade related workshops, etc.
